RAJ PATIL *Full-Stack Developer*

Surat | rajpatil052003@gmail.com | +91 7621014593 | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-stack developer pursuing M.Sc. in Information Technology, currently an Operations, Onboarding & Product Associate Intern at Onomatrix Labs, contributing to a live local-business and loyalty platform across a Python (Frappe) backend, React merchant dashboard, Next.js web app and Flutter mobile app. Strong backend foundation in Django, REST APIs, payment workflows and database optimization, and delivers client websites end to end.

EXPERIENCE

Onomatrix Labs Private Limited 06/2026 – Present

Operations, Onboarding & Product Associate Intern

- Build REST APIs and data models on Frappe (Python) for a two-sided platform covering outlet discovery, offers, bill payments, bookings and a cross-outlet loyalty wallet.
- Shipped backend features including Club Talks merchant posts with geo-ranking, event management, OTP login hardening, Razorpay payment guards and AI menu extraction.
- Built React merchant-dashboard pages and Next.js customer flows: pay-bill redesign, spin-wheel rewards, referral invites, share pages and account deletion.
- Developed Flutter app features: creator clubs, wallet and coins ledger, outlet discovery and on-device video compression.
- Work in a pull-request based Git workflow across four repositories with a team of developers.

Zapuza 11/2025 – 05/2026

Python Developer Intern

- Contributed to backend development using Python and Django for production-level web applications.
- Implemented authentication systems and role-based access control.
- Designed relational database schemas and optimized Django ORM queries.
- Fixed bugs, enhanced existing features, and improved backend performance.
- Collaborated with the development team using Git-based workflows and structured development practices.

PROJECTS

Studio Viana · *Client Portfolio & Ordering Site* Live Demo

Tech Stack: Vite, JavaScript, Node.js, SQLite, GSAP, Google Sign-In, Render

- Built a two-mode site for a wallpaper and 3D visualization studio with theme galleries and an instant price estimate from size, finish and quantity.
- Implemented user login with Google sign-in, an MFA-protected admin, a protected wallpaper catalogue, admin downloads and a print-request flow.

Chamomile Media · *Agency Website (In Progress)* Live Demo

Tech Stack: HTML, CSS, JavaScript, Netlify Forms, Google Apps Script

- Built a digital marketing agency website with services, client work and testimonials.
- Handled enquiries with Netlify Forms and an optional Google Apps Script backend writing leads to Google Sheets.

RajMind · *Enterprise AI Knowledge Assistant* Live Demo

Tech Stack: Django, DRF, PostgreSQL, Celery, Redis, Docker, Gemini / Groq

- Built a multi-tenant knowledge platform with isolated workspaces and Owner / Admin / Member / Viewer role-based access.
- Processed PDF, DOCX and TXT uploads asynchronously (extraction, chunking, embeddings) in the background (Celery workers or an in-process thread).
- Implemented RAG answers grounded only in uploaded documents, citing the exact source passages, with follow-up-aware multi-turn chats and usage analytics.
- Added multi-key failover across Gemini and Groq so answers keep working when an API key hits its rate limit.

Eatify · *Online Food Ordering Platform* Live Demo

Tech Stack: Django, SQLite, REST APIs, Cashfree Hosted Checkout

- Designed and developed a full-featured food ordering system including cart, wishlist, checkout, and order history modules.
- Integrated Cashfree Hosted Checkout for secure online payment processing (UPI, Cards, Net Banking).
- Implemented payment session handling and return URL-based confirmation flow to dynamically update order status.
- Built REST APIs for cart management, order placement, and checkout workflows.
- Implemented role-based admin access control and order status tracking.
- Optimized ORM queries, improving response time by approximately 20%.

DocuMind · *Intelligent Document Interaction System* Live Demo

Tech Stack: Django, Python, FAISS Vector Store, Groq (Llama-3), LangChain

- Developed a Django-based platform enabling users to upload PDF documents and interact with content using AI-powered semantic search.
- Implemented document text extraction, embedding generation, and vector storage using FAISS.
- Integrated Groq LLM (Llama-3) for natural language query responses and document summarization.
- Designed secure upload endpoints and backend logic for processing and querying structured document data.
- Structured backend architecture to support scalable semantic retrieval workflows.

dlt-error-codes · *Open-Source npm Package* npm

Plain-English explanations and fixes for Indian DLT SMS error codes, each citing its source. Zero dependencies, CI-tested, MIT licensed.

EDUCATION

Shree Ramkrishna Institute of Computer Education & Applied Sciences, Surat 2027

Master of Science in Information Technology (Pursuing)

Bhagwan Mahavir University, Surat 2025

Bachelor of Science in Information Technology

TECHNICAL SKILLS

Languages
Python, SQL, JavaScript, TypeScript, Dart

Backend
Django, DRF, Frappe, FastAPI, Node.js

Frontend & Mobile
React, Next.js, Tailwind CSS, Flutter

Databases
MySQL, PostgreSQL, SQLite

Tools
Git, GitHub, Postman, Docker

Integrations
Razorpay, Cashfree, Google Sign-In, OTP/SMS

AI & Data
LLM APIs, RAG, FAISS, Pandas, NumPy

Concepts
REST APIs, Auth & RBAC, ORM Optimization, Vector Search

CERTIFICATIONS

- AWS Cloud Computing & JIRA Workshop
- Generative AI on AWS (PartyRock & Amazon Bedrock)
- Design Thinking for Entrepreneurship
